DEDICATION

I dedicate this book to my father Mr. Nkoba Yakobo and my mother Mrs. Jeneroza Nkoba. I also dedicate it to my dear wife Jane Turyansingura Baybagambi who tolerated my absence for two years. I cannot forget my sons Naturinda, Natukunda, Natuhwera and daughter Natumanya who missed the fatherly care for a long time.
ACKNOWLEDGEMENT

My sincere gratitude goes to my supervisor Prof. Martin Amin who unreservedly guided me from the beginning to the end. Without him this study would not have been a success.

Secondly, I thank my lecturers in the Department of Curriculum, Teaching and Media. My regards go to Mrs Kasirye, Mrs. Sikoyo, Dr. Mary Ocheing and Dr. Ssentamu who helped me during my course of study.

Thirdly, thanks to the respondents who were cooperative during the research. Without their help, I would not have been able to get the information needed for the study.

Fourthly my gratitude also goes to my family, especially my wife Jane Turyasingura Byabagambi, who supported me both financially and morally. Without her, this work would not have been completed.

I wish also to extend my gratitude to my friends especially course mates, who encouraged me during the course of study.

Lastly, thanks to Mrs. Evelyn Tarushoke who helped me to type this work. She did a commendable work.

May God reward abundantly all those who helped me in one way or the other till I completed my course.

ABSTRACT

This study was carried out to assess the impact of instructional supervision on Secondary School Teachers’ Professional Practices in Kabale District. The Professional practices considered were; Teaching, attitudes of the teachers towards teaching, the way classroom teachers relate with students and school administrators.

The study involved 20 headteachers, 20 directors of studies and 274 classroom teachers. The headteachers and directors of studies formed the group of instructional supervisors who offer the instructional supervision to classroom teachers.

Four research questions were formulated to guide the study. From these research questions, four statistical hypotheses were formulated as;

1. Instructional supervision does not have a significant effect on the teachers’ teaching in secondary schools in Kabale District.
2. Instructional supervision does not influence the attitudes of classroom teachers towards teaching in secondary schools in Kabale District.
3. Instructional supervision does not significantly influence the relationship between classroom teachers and students.
4. Instructional supervision does not significantly influence the relationship between classroom teachers and school administrators.

Data was collected using two types of instruments namely, questionnaire and interviews. It was analysed using the Chi-square ($x^2$) test of goodness of fit at 0.05 level of significance.

The statistical analysis of the data brought to light that the role played by the headteachers and directors of studies was vital in assisting classroom teachers in improving their professional practices.

The findings revealed that the attitudes of the classroom teachers towards teaching is generally positive. This was contributed by the instructional supervision offered. They also revealed that the way the classroom teachers relate with students was influenced by the instructional supervision. It was however found out that the way the classroom teachers relate with school administrators was not influenced by the instructional supervision.
